

12/12/22

LAB PROGRAM: 6

Aim:- Demonstration of WEB Server and DNS using packet tracer

Procedure:-

HTTP:-

- * Switch it on
- * Edit in file manager

DHCP:-

- * Pool name
- * DNS Server address
- * start IP address
- * No TFTP IP address

Add

DNS:-

Name:- Random name (Eg:- Omar)

Address:- 10.0.0.1
↳ www.omar.com.
↳ IP address of the server.

Click "Add"

Go to one of the clients / PC:-
we change IP configuration to DHCP from static then we can get the PC's IP address automatically.

Desktop → web browser →
Syntax:

www.omar.com/helloworld.html
File → helloworld.
↳ contents of helloworld will

Be displayed on execution

outputs:

URL : http://www.bmsce.ac.in/hello.asp

Hello I am good !!!

Back

12/12/21 ✓ Result :- Therefore web server and
DNS was configured successfully
